ABSTRACT:

PROBLEM TO BE SOLVED: To authenticate also a true owner of an IC card when authenticating a specific system by the IC card.

SOLUTION: The card information of IC cards each of non-contact type and the information of a true owner of the IC card has been registered in a database 2 as registered card information 2a and registered fingerprint information 2b. When a user of the non-contact IC card 4 puts the IC card 4 on a non-contact reader/writer 3 and touches a fingerprint input means of the IC card 4 with a finger, the fingerprint information is read out by the IC card 4 and the fingerprint information and the card information 4e are read out together by a server 1 through the non-contact reader/writer 3. The server 1 confirms whether the card information 4e has been registered as the registered information 2a or not to authenticate the IC card 4, and when the IC card 4 is authenticated, confirms whether the fingerprint information has been registered as the registered as the registered information 2 information 2 or not to authenticate the IC card 4 is authenticated, confirms whether the fingerprint information has been registered as the registered as the registered as the registered as the registered information 2 information has been registered as the registered as the registered as the registered as the registered information 2 information has been registered as the regis
